BRING VALUE TO YOUR GREENHOUSE WITH A MODINE HEATER.

Introducing the new power vented, PTP unit heater line. It was designed specifically with the greenhouse owner in mind to provide high value at a reasonable cost. Backed by Modine’s nearly 100 years of pioneering HVAC innovation, the horizontal mounted PTP delivers 80% thermal efficiency in a small-business-friendly package.

Protect your plants and your bottom line all year long with Modine, the trusted leader in greenhouse climate control.

1 Ratings shown are for elevations up to 2,000 ft. For elevations above 2,000 feet, ratings should be reduced at the rate of 4% for each 1,000 feet above sea level. (In Canada see rating plate.) Reduction of ratings requires use of a high altitude kit.

2 Data taken at 55°F air temperature rise. At 65°F ambient and unit fired at full-rated input. Mounting height as measured from bottom of unit, and without deflector hoods.

BENEFITS OF THE PTP LINE INCLUDE:

- Stainless steel heat exchanger comes STANDARD on all units to withstand corrosive combustion air found inside a greenhouse, extending the life of your investment
- 10-year heat exchanger warranty is STANDARD, providing you peace of mind
- Constructed with Modine’s proven tubular heat exchanger design
- Installs quickly and easily with field wiring connections and knockouts for quick access to gas and electricity
- Standard power exhaust simplifies side-wall or roof venting with small diameter vent pipe
- Permanently-lubricated motor for trouble-free dependability
- Optional finger-proof fan guard for low mounting height applications
- Made in the USA
